➤ **About Belgrade**

Belgrade is the capital city of Serbia and has a population of around 1.7 million. Name Belgrade literary mean the White City. It is one of the oldest cities in Europe and has since ancient times been an important crossing of the ways where the roads of eastern and western Europe meet.

The coordinates of Belgrade are marked in the centre of the city (in Knez Mihailova Street): 44°49'14" of geographic latitude north, 20°27'44" of geographic longitude east and 116.75 m above sea level. Belgrade is located at the confluence of the Sava and Danube rivers, where the Pannonian Plain meets the Balkans. The medieval town of Singidunum, which has been known by the Slavic name of Belgrade since 878, was built at the site where the Belgrade Fortress and the Kalemegdan park are situated today, above the place where the Sava flows into the Danube. Due to its position it was rightfully named "Gates of the Balkans" and the "Doors of Middle Europe".

Geographically, Belgrade comprises three areas: the Old Town on the right bank of the Sava and Danube, New Belgrade on the left bank of the Sava, and Zemun on the banks of the Danube beyond New Belgrade. Belgrade is the capital of Serbian culture, education and science. It is home to the highest concentration of nationally important science and art institutions: the [Serbian Academy of Science and Art](#), founded in 1886 as the Serbian Royal Academy; the [National Library of Serbia](#), founded in 1832; the [National Museum](#), founded in 1841 and the [National Theatre](#), founded in 1869. The city is also home to [University of Belgrade](#), founded in 1869 as the High School.
